# Carbon Reduction Plan

Supplier name: Biocon Biologics UK Limited

Publication date: 11<sup>th</sup> July, 2025

## Commitment to achieving Net Zero

**Biocon Biologics UK Limited** is committed to achieving Net Zero emissions by 2045 in UK.

**Biocon Biologics UK Limited** (BBUK) and Biosimilar Collaborations Ireland Limited (BCIL) is responsible and committed with clear vision in achieving Net Zero, and combat climate change. Our planet is experiencing sharp rise in global temperatures and series extreme climate events. BBUK understands the linkage between global warming and human activity, we as a responsible company are determined to join the fight on climate change with the international community. Hence, BBUK pledges to reduce carbon and achieve net Zero by 2045. To achieve this, we have series carbon reduction initiatives and programs implemented and planned.

## Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

## Emissions reduction targets

Biocon Biologics UK Limited is committed to achieving Net Zero emissions by 2045.

### Carbon Reduction Programs

Biocon Biologics UK Limited and Biosimilar Collaborations Ireland Limited are accounting its carbon emissions, for the very first time, we are in the initial stages of developing comprehensive carbon reduction plan.

we plan to undertake to reduce our carbon footprint by implementing the following key strategies and initiatives.

#### Business Travel

- **Virtual Meetings:** We will, where possible, reduce the need for business travel by use of technology of virtual meeting platforms such as Microsoft Teams, Zoom etc.
- **Travel Policies:** We will update our travel policies to encourage rail travel, over air travel for domestic trips and promote the use of public transportation where feasible.

#### Third-Party Transportation and Logistics

- **Suppliers Engagement:** We will engage with our third-party logistics partners and encourage them to adoption of low-emission vehicles like electric vehicles (E.V.), Air to sea shipment and more efficient logistics practices.
- **Sustainable Packaging:** We will reduce our carbon footprint in our logistics by minimising packaging materials and using sustainable alternatives where feasible and practical, ensuring the products are not harmed.

#### Employee Commuting

- **Flexible Working:** We will promote hybrid, flexible working hours to reduce the frequency and distance of employee commutes.
- **Public Transport Incentives:** We will encourage our employees to use public transportation, where possible we will encourage them to carpool.

#### Leased assets

- We operate in leased assets which are LEED certified, and are ISO 14001:2015 certified
- Additional we engage with Lessor to provide energy efficiency leased assets

Additionally, global BBL group has carbon reduction projects such as

- We have adopted of renewable energy for our manufacturing plants (more than 44% in India & Malaysia).
- Process optimization and energy efficiency in manufacturing process.
- Invest in the innovation and research and development of circular process and products.
- Sustainable procurement practices working with responsible suppliers and partners and engaging with them to implement sustainable practices and building responsible supply chain.
- Green Logistics such as Air to sea shipment translation, alternative fuels etc.

These strategies form the foundation of our commitment to reducing our carbon footprint. In the future we hope to implement further measures such become carbon neutral for all our operations globally. We like to continuously monitor our progress and exploring new opportunities to reduce our and play out part in combating climate change.

**Declaration and Sign Off**

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard<sup>1</sup> and uses the appropriate Government emission conversion factors for greenhouse gas company reporting<sup>2</sup>.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard<sup>3</sup>.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

**Signed on behalf of the Supplier:****Mr. Naveen Narayanan**

Global Head of Human Resources
